

Zetafax - Administration Features ●●●

Zetafax offers IT Managers fast, easy installation and deployment. It requires little or no user training, is straightforward to maintain and offers a range of advanced management features.

Benefits

Fast to set up: Easy to use configuration wizard manages entire set up process

Simple to roll out: Supports Windows Group Policy, allowing centralized client installation

Easy to use: Intuitive client requires virtually no user training

Low maintenance: Active Directory integration means no client reconfiguration needed at the desktop

Strong integration: Designed to work with existing infrastructure & applications

Full & flexible support: Wide choice of support options

Zetafax offers IT Managers fast, easy installation and deployment. It requires little or no user training, is straightforward to maintain and offers a range of advanced management features.

Fast, easy set-up and roll out ●●●

For set-up in just a few minutes, Zetafax includes a configuration wizard. It helps you to get your system operational quickly, guiding you through creating and sharing of system files and folders, adding new users and configuring devices.

Zetafax also supports Windows Group Policy, so you can deploy Zetafax Clients from a central location across your network.

Easy to use ●●●

The richly-featured and intuitive Zetafax Client requires very little training and makes faxing fast and easy. Alternatively you can enable your Zetafax users to fax from their Microsoft Outlook, Lotus Notes or SMTP email clients, completely removing the need to learn a new application. Users can also fax directly from their Microsoft Office applications.

Sending a fax from a Microsoft application using Zetafax Office Add-in is as simple as point.click.fax

Low maintenance ●●●

Zetafax is very easy to manage. When making changes to your network, Zetafax integration with Active Directory simplifies the process of managing users. It also provides remote monitoring, so you can manage all servers from a single location.

To help maintain system efficiency, the Zetafax Update Service lets you install any new product features and fixes automatically as they become available.

Equisys is one of the world's leading fax technology innovators

Strong integration ●●●

Works on the latest platforms

Zetafax is designed to work with your existing systems and applications. It provides native integration with Microsoft Exchange and Lotus Domino and supports Microsoft Office.

Supports a range of fax hardware

A wide range of fax hardware devices are supported, including intelligent fax boards, ISDN controllers and V.34 modems, enabling high volume faxing and direct-to-desktop faxing.

Integration-ready for automated faxing

To automate faxing from existing business applications such as CRM or accounting systems, Zetafax can be integrated quickly and easily using the optional API Toolkit.

Full range of technical support options ●●●

Equisys support options include Software Assurance, which provides software updates, upgrades and service packs. Telephone and email support is also available. Please ask for details.

Rich set of advanced management features ●●●

Advanced server queue management for reprioritizing, aborting or rushing of faxes.

Do-not-dial control, restricting sending access to specific fax numbers.

Junk message filter, blocking incoming faxes from specific fax senders.

System-wide conversion of inbound faxes to PDF format.

Automatic user account creation.

Reporting module, providing full fax log records, charge codes, audit trails and archiving features.

Fax usage can be billed to specific departments or clients.

Support for clustered Microsoft Exchange server environments, Windows child domains and Least Cost Routing (Corporate and Enterprise Editions only).

Add-ons ●●●

Add Zetafax Software Assurance to your purchase, and you'll receive all software upgrades, updates and fixes at no further cost during your contract.
